Education

Sastra Deemed University

B.Tech Electronics and Communication Engineering with CGPA : 7.85 / 10

Oct. 2022 – Jun 2026

Thanjavur, Tamil Nadu

Rasi International CBSE School

HSC : 84.33 Percentage

May. 2021 – Jun 2022

Namakkal, Tamil Nadu

Sri Vidya Mandir CBSE School

SSLC : 90.8 Percentage

May. 2019 – Jun 2020

Salem, Tamil Nadu

Experience

Steel Authority of India Limited (SAIL)

Software Intern

Jun 2025 – Jul 2025

Salem, Tamil Nadu

- Assisted in developing and monitoring Java-based modules for industrial machine data tracking.
- Analyzed data flows across internal systems (SMS, HRM, CRM) to understand workflows and support data-driven monitoring processes
- Contributed to designing a web-based reporting interface (HTML, CSS, JavaScript) to visualize test results and streamline daily reporting.
- Studied and aligned with industrial quality control and safety protocols, identifying opportunities for basic process visibility improvements.

Programming and Application Development(MS)

Fullstack Developer

Oct 2023 – Jun 2026

Thanjavur, Tamil Nadu

- Assisted in development of the front end and Backend of a mobile application for Android devices using MERN Stack.
- Gained experience in DSA and various AI Tools to manage user inputted data across multiple platforms including web and mobile apps.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- Utilized Android Studio as a development environment in order to visualize the application in both iOS and Android.

Projects

Speech Denoising and Recognition System | *Python ,TensorFlow ,NumPy ,PyTorch ,AIML*

Jan 2026

- Built an AI-native speech intelligence pipeline combining neural audio denoising with LLM-based transcription and post-processing, enabling robust understanding of noisy, real-world speech inputs
- Integrated LLM APIs with structured prompt design to refine transcriptions, generate contextual summaries, and standardize outputs from raw audio predictions
- Designed a modular workflow (audio preprocessing → feature extraction → model inference → LLM orchestration) aligned with scalable, API-driven system architecture

LifeLink - Smart Blood Donation Platform | *HTML , CSS , Node.js , Express.js, MySQL , Javascript*

Sept 2025

- Stack used - Node + SQL - HTML , CSS ,MySQL , Node.js , Express.js .
- Developed a data-driven web application for real-time blood donor selection with efficient use of REST APIs .
- Enabled rapid identification of nearby eligible donors during emergency situations.
- Implemented efficient logic to filter , preprocess and match donors accurately.

JoBzz - Automated Job Alert System | *n8n , JavaScript , LinkedIn , Google Sheets, Agentic AI*

Mar 2025

- Created a n8n workflow automation to find Job openings and alert the user.
- Implemented Keyword based filtering using JavaScript to find matching roles.
- Developed the notification system that sends job alerts through Telegram.

Wifi Network Controller | *C++ ,ESP32 Microcontroller , Flash Tool*

Jan 2025

- Designed a system simulating a Denial of Service (DoS) attack within a limited coverage area.
- Implemented Wi-Fi penetration module to keep required networks alone.
- Strengthened understanding of networking concepts and real-time embedded systems.

Technical Skills

Languages: Java, Python, HTML, CSS, JavaScript, SQL, React.

Skills:VS Code, Github, Rest APIs, Android Studio, AIML, GenAi, LLMs, RAG, Claude, NUMPY, PANDAS.

Technologies/Frameworks: Express.js, Node.js, n8n, pytorch , Tensorflow, Kubernetes, RENDER, Flutter.
